WE'RE INVESTING IN YOUR NEIGHBORHOOD

WATER MAIN REPLACEMENT PROJECT

Dear California American Water Customer:

California American Water will begin a water main replacement project on Cannery Row between Hoffman and David, and on David between Cannery Row and Wave Street. Work is tentatively scheduled to start after Labor Day, on or after Tuesday, September 4, 2018. The project will take approximately four months to complete. Construction work will occur between 8:00 a.m. and 6:00 p.m., Monday through Friday.

No work will occur during the holiday periods of November 22 – November 26, 2018, and December 23, 2018 – January 1, 2019.

This work is necessary to maintain critical infrastructure and reduce future disruptive main breaks. It is a multi-phase project involving potholing to verify existing utilities, street excavation and pipe replacement. Water sampling will occur upon completion of the new pipe, followed by temporary paving, service line connections and finally, street repair. There will be times where water service is interrupted for short periods. You will be notified beforehand if service needs to be disrupted.

While construction is underway, you may expect the following:

• On-street parking may be restricted
• Streets may be closed or lanes reduced
• Detours may be in place
• Sidewalks at intersections may be closed
• Construction noise
• Cannery Row may be converted to a one-way street with traffic flowing toward the Aquarium

Traffic control personnel will be on post during construction hours. If you have vendors that make deliveries to your business, please inform them of this project.

For questions or concerns, now or during the project, please contact Monterey Peninsula Engineering at 1-831-277-0158 or California American Water at 1-831-917-3224.

Thank you in advance for your patience and cooperation.

Sincerely,

Lesley Silva
California American Water
